

Learning to Dance

CONSISTENCY

Consistency is key when learning how to dance. Lessons should be taken once a week to protect your investment.

LISTEN TO MUSIC

The music is there for a reason! Use it! Listening to the music, tempo, and elements will help you learn to dance faster while understanding the differences between the dances.

COUNTING

Always count the beats when learning new steps. This will help you keep time and understand your dance moves!

TAKE NOTES

Bring a notebook to class to jot down all tips and techniques from your lesson, so you can have it handy when you practice.

PRACTICE

Practicing your steps, techniques, and musicality daily will enhance your dancing. This will help you progress faster on your lessons!
